THE CHALLENGES OF TRACKING STEELSTEEL

Traditional ways of identifying steel are unreliable and inefficient

Vital information on steel materials can be lost

v with GoTagID

GoTagID is the first of its kind tagging solution that provides reliable tracking and tracing capabilities after the point of sale.

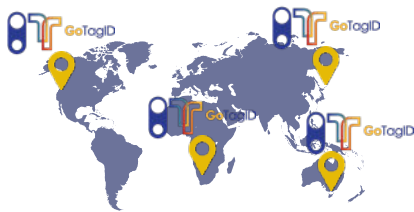

Rapide Tags are the affordable and reliable way to replace the high failure rates of existing sticker methodologies.

They hold up excellently through the processes of shipping and logistics prior to actual site implementation.

Endure Tags have been tested and proven to withstand high heat, vibration, mechanical impact, and corrosive conditions for at least 5 years.

Traces origin, factory manufacturing data, testing records, and present and historical geolocations.

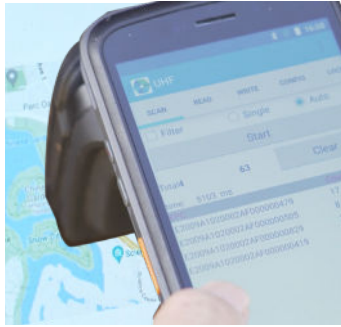

The Unique ID enables end users the ability at tracking and tracing asset data.

Geolocation for the traceability of origin, anywhere in the world.

Enhanced to withstand the harshest and most volatile conditions.

The GoTagID Solutions

A *seamless solution* for all your asset management needs.

With just one simple scan you can retrieve all your product information and its geolocation. All information is stored in the cloud and is accessible 24/7/365 worldwide.

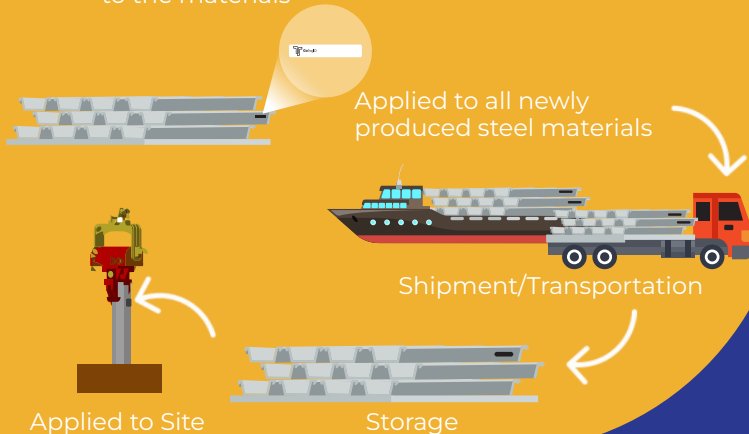

Compliant with Singapore's BCA Reusability on steel BCI 2012 regulations (Design Guide on Use of Alternative Structural Steel and Electronic Regulatory Submission System ERSS).

GoTagID - Tagging Solutions

Rapide Tag Solution

- Affordable and Reliable
- Replaces the high failure rates of existing process
- Provides a way to trace and store critical data unique to the materials

Endure Tag Solution

Tested and proven to withstand:

- High Heat
- Vibration
- Mechanical Impact
- Corrosive Conditions

GoTagID - Gantry Scanner

The GoTagID Gantry Scanner allows users to automatically track the movement of tagged assets in and out of the location.

- Reduces manpower requirement
- Prevents human error in record keeping
- Easily track movement

Help us understand your requirements.

The GoTagID team is here to support you.
